Roman Roads & Architecture

1. The diagram below shows a cross-section of a Roman road. Place the labels below into the correct place on the diagram.

- 1) At the bottom of the trench, the Romans put a layer of big stones.
- 2) Broken stones, pebbles, cement and sand to make a firm base.
- 3) Cement mixed with broken tiles.
- 4) Paving stones formed the surface of the road. These were cut so they fitted together tightly.
- 5) Kerb stones at the sides held in the paving stones and made a channel for the water to run away

2. Using the reader “Roman Architecture,” fill in the following graphic with at least **2 facts** about each topic.
